EXPERIENCE

Egnyte, Poznań — *Junior Site Reliability Engineer*

AUGUST 2018 - PRESENT

- Maintaining Google Cloud and KVM-based production environments.
- Cooperating with international teams on solving critical problems.
- Using New Relic, Grafana and Kibana for debugging and fixing production issues.
- Future-proofing company's infrastructure by identifying and addressing performance challenges.
- Using Python and Ansible for automation, configuration and development of new internal tools.

EDUCATION

Adam Mickiewicz University, Poznań — *Bachelor's Degree in Computer Science*

SEPTEMBER 2018 - PRESENT

PROJECTS

wypok — *Full Stack Web Application*

FEBRUARY 2017 - APRIL 2017

Web App which mimicked Reddit. Written from scratch, made for *Daj Się Poznać 2017* contest.
Implemented posts, comments, user profiles and significant caching patterns for optimization.
Technologies used: Python 3.6, Django, Docker, Redis and PostgreSQL.

VOLUNTEER EXPERIENCE

Mentor — *Django Girls Poznań*

AUGUST 2018

Helped attendees at taking their first steps in programming with Python and Django - started from basic
programming theory, then went through practical approach with REPL and simple scripts and finally
ended with full stack web application which was publicly accessible from the internet.
